

Invesco Pan European High Income Fund

31 March 2024

Morningstar Rating™
★★★★★

Important Information

- The Fund invests primarily in European securities (debt and equity).
- Investors should note the dynamic asset allocation risk, liquidity risk, risk of Eurozone crisis, risk of investing in convertibles/convertible bonds/convertible debts, sovereign debt risk, concentration risk of investing in higher yielding European debt securities and equities, risk of investing in perpetual bonds, risk associated with investments in debt instruments with loss-absorption features including senior non-preferred debts, contingent convertible bonds which are subject to the risk of being written down or converted to ordinary shares upon the occurrence of pre-defined trigger events and may result in a significant or total reduction in the value of such instruments, currency exchange risk, equities risk, credit rating risk, volatility risk, general investment risk, and investment in bonds or other fixed income securities is subject to (a) interest rate risk (b) credit risk (including default risk, downgrading risk and liquidity risk) and (c) risks relating to high yield bonds/non-investment grade bonds and/or un-rated bonds.
- Financial derivative instruments (FDI) may be used for efficient portfolio management and hedging purpose and extensively for investment purposes. Net derivative exposure may be more than 100% of the Fund's net asset value. Risks associated with FDI include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. As a result of the use of FDI extensively for investment purposes, investors should note the additional/high leverage risk. Also, the active FDI positions implemented by the Fund may not be correlated with its underlying securities positions held by the Fund which may lead to a significant or total loss to the Fund. The Fund does not have any guarantees. Investors might not get back the full amount of money you invest.
- For certain share class(es), the Fund may at discretion pay dividend out of the capital and/or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction of the net asset value per share in respect of such share class after the monthly distribution date. (Note 1)
- In addition, investors of Monthly Distribution-1 share class that are currency hedged (MD-1 hedged) should be aware of the uncertainty of relative interest rates. The net asset value of the MD-1 hedged may fluctuate and may significantly differ from other share class due to fluctuation of the interest rate differential between the currency in which the MD-1 hedged is denominated and the base currency of the Fund and may result in a greater erosion of capital than other non-hedged share class. (Note 2)
- The value of the Fund can be volatile and could go down substantially.
- Investors should not base their investment decision on this material alone.

Objectives and investment strategy

The Fund aims to achieve a high level of income together with long-term capital growth. The Fund seeks to achieve its objective by investing primarily in European securities (debt and equity). At least 50% of the NAV will be invested in debt securities. For the full objectives and investment policy please consult the current prospectus.

Yield

Gross Current Yield	4.93
Gross Redemption Yield	5.22

The current yield of a bond fund is the weighted average current yield of underlying bonds in gross in the portfolio. Current yield of an individual bond refers to the annual interest divided by the market price of a bond. The figure is not the dividend yield received by the investors and is subject to change from time to time. For annualized dividend yield, please refer to Distribution information.

3 year characteristics*

Volatility %	7.70
--------------	------

Volatility is measured by the standard deviation of the fund, based on its annual rates of return over the past 3 years in base currency of the fund. So, for funds with performance less than 3 years, the volatility figure will not be available.
