**INVESCO BELT AND ROAD BOND FUND**  
(A SUB-FUND OF INVESCO TRUST SERIES)

**Description of the Fund**

INVESCO BELT AND ROAD BOND FUND (the “Fund”) is a sub-fund of Invesco Trust Series (the “Trust”), a Hong Kong domiciled umbrella structure unit trust. It is governed by the laws of Hong Kong.

The Trust is an umbrella fund with one or more sub-funds. Each sub-fund will have its own separate and distinct investment policy. The date of commencement of the Fund was 1 March 2018.

The Fund is a thematic product which aims to achieve longterm total returns in terms of both income and capital growth by investing primarily in debt securities whose issuers, guarantors and/or domiciled countries could or would directly or indirectly benefit from China’s Belt and Road vision of increasing land and sea paths to connect Asia, Europe, Middle East and Africa and their adjacent seas (the “Belt and Road Region”) for closer economic co-operation (the “Belt and Road Initiative”).

*The above details are in summary form only and must be read in conjunction with the detailed information contained in the current prospectus.*

**Manager's Report**

FOR THE PERIOD FROM 1 MARCH 2018 TO 30 SEPTEMBER 2018

*Review Period - 1 March 2018 to 30 September 2018*

The Fund was launched on 1 March 2018. We have seen many new progresses related to China's Belt and Road Initiative ("BRI") since then. On one hand, we continue to see China's strong commitments to the long-term BRI which increases connectivity between China, Asia, Middle East, Africa and Europe. On the other hand, we started to see other major countries have increased their capital commitments to the countries in the Belt and Road region. The US Congress has approved USD60 billion International Development Finance Corporation to support American firms to invest in Asia and Africa. The European Commission has made an official proposal to increase the EU's budget by EUR 60 billion so as to increase connectivity between Europe and Asia. The UK has indicated its mission to make the UK as the biggest G7 country to invest in Africa by 2022. All the capital inflows into Belt and Road region have been put into good use by many recipient countries and brought improvements to productivities and efficiencies. In fact, as successful examples, the sovereign credit ratings of Mongolia and Ghana have recently been upgraded by international rating agencies.

The Fund aims to invest in USD bonds from countries which receive capital from China and would be able to put the capital in productive use. We endeavor to avoid the countries that put little efforts to improve their environment, social and governance issues as they may not be able to use the capital to improve their productivity growth. The Fund's strategy is to overweigh in the countries which have good diplomatic relationships with not only China, but also the US, EU and UK, as they tend to benefit from more capital inflows. Given that European countries are within the Belt and Road region and many issuers benefit from the BRI as well, the Fund has substantial investments in USD denominated bonds issued by Western European financial and corporate issuers.

Middle East countries are important members of the BRI. The Fund added exposure to oil exporting Gulf countries in the third quarter of 2018 due to optimistic outlook of energy prices and solid credit fundamental of related sovereign issuers. The decision to include more Gulf countries into the major bond index, EMBI, in 2019 will continue to drive capital inflow into the region. The related holdings are expected to out-perform.

The market has been worrying about the potential "trade war" risks between the US and China. The Fund does not invest in sectors that were vulnerable to such risks. The potential trade tension between the two largest economics in the world will push both governments to diversify their businesses from each other. Thus, the Belt and Road region countries will become beneficiaries of more capital flow and more trade flow from both China and the US.

The Federal Reserve Bank ("FED") has been on course to hike the policy interest rates. We believe that the robust domestic growth in the United States will keep the FED on its hiking path. Thus, most of the time, the Fund has been hedging the interest rate risks and reduced the portfolio duration to very low levels. This short duration strategy has been contributing positively to the performance of the Fund. We expect such strategy to be continued in the foreseeable future.

Since inception to 30 September 2018, the A (USD)-Acc share class of the Fund recorded a total return of -3.2%. The 100-day volatility of the Fund has always been kept below 3.1% p.a. This shows the successful implementation of the "low-volatility" strategy in the Fund. Aside from the "low-volatility" strategy, with the new issue pipelines very active in the fourth quarter of the year, we will continue the "new issue premium" strategy to capture additional alpha for the Fund.
