

Invesco Emerging Markets Bond Fund

31 August 2019

Morningstar Rating™
★★★★

Important Information

- The Fund invests primarily in debt securities of issuers in emerging market countries, which may be listed or traded elsewhere.
- Investors should note the emerging markets risk, contingent convertibles risk, risk of investing convertibles/convertible bonds/convertible debts, concentration risk of investing in debt securities of issuers in emerging markets, currency exchange risk, credit rating risk, volatility risk, general investment risk, and investment in bonds or other fixed income securities is subject to (a) interest rate risk (b) credit risk (including default risk, downgrading risk and liquidity risk) and (c) risks relating to high yield bonds/non-investment grade bonds and/or un-rated bonds.
- Financial derivative instruments (FDI) may be used for efficient portfolio management and hedging purpose and for investment purposes. Risks associated with FDI include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. As a result of the use of FDI for investment purposes, investors should note the additional/high leverage risk. Also, the active FDI positions implemented by the Fund may not be correlated with its underlying securities positions held by the Fund which may lead to a significant or total loss to the Fund.
- For certain share class(es), the Fund may at discretion pay dividend out of the capital and/or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction of the net asset value per share in respect of such share class after the monthly distribution date. (Note 1)
- In addition, investors of Monthly Distribution-1 share class that are currency hedged (MD-1 hedged) should be aware of the uncertainty of relative interest rates. The net asset value of the MD-1 hedged may fluctuate and may significantly differ from other share class due to fluctuation of the interest rate differential between the currency in which the MD-1 hedged is denominated and the base currency of the Fund and may result in a greater erosion of capital than other non-hedged share class. (Note 2)
- The value of the Fund can be volatile and could go down substantially.
- Investors should not base their investment decision on this material alone.

Objectives and investment strategy

The Fund aims to achieve a high level of income together with long term capital growth. The Fund seeks to achieve its objective by investing primarily in debt securities of issuers in emerging market countries, which may be listed or traded elsewhere.

Yield	%
Gross Current Yield	5.28
Gross Redemption Yield	5.61

The current yield of a bond fund is the average current yield of underlying bonds in gross in the portfolio. Current yield of an individual bond refers to the annual interest divided by the market price of a bond. The figure is not the dividend yield received by the investors and is subject to change from time to time. For annualized dividend yield, please refer to Distribution information.

3 year characteristics*

	A (USD)-FixMD Shares
Volatility	6.09
Peer Group Volatility	5.57

Volatility is measured by the standard deviation of the fund, based on its annual rates of return over the past 3 years in base currency of the fund. Peer Group Volatility refers to the volatility of the offshore and international funds which are categorized under Global Emerging Markets Bond Sector by Morningstar.

Annualized dividend (%) = (Amount/Share X Frequency) ÷ Price on record date. Upon dividend distribution, the Fund's net asset value may fall on the ex-dividend date. For Frequency, Monthly = 12; Quarterly = 4; Semi-Annually = 2; Annually = 1. All distributions below USD 50 in value (or its equivalent) will be automatically applied in the purchase of further shares of the same class. Positive distribution yield does not imply a positive return.
