

Account Summary

Is my pension investment making money?

A positive figure indicates that you have recorded gains, and negative figure means losses. Please also note that the gain/loss number under the “Statement Period” column only shows the investment return from April 1 last year to March 31 this year. If you want to find out how much you have made ever since you joined the Plan, you should look under the “Since Joining Plan” column.

Point to Note:

The gain/loss figures shown in this statement are unrealized returns. Your actual return will depend on the fund price(s) at which you subsequently sell your fund(s).

Detailed Account Balance

Why is the “Vested Balance” for my employer voluntary contributions (VC) less than the corresponding amount under “Closing Balance”?

Generally speaking, your employer should have set a vesting scale on employer VC. According to the vesting scale, you will receive an increasing portion of the employer VC as your years of service increases. If your length of service is less than 10 years, it is likely that your vested employer VC portion is less than the “Closing Balance”.

Point to Note:

All mandatory contributions (including those made by you and your employer) as well as your own voluntary contributions and flexible voluntary contributions are fully and immediately vested to you.

Contribution Details

Why is there an outstanding contribution?

Don't worry. The statement only shows contribution received on or before March 31. Contribution made but not yet received by such date is still considered outstanding.

Point to Note:

According to MPF regulations, employers are required to make contributions by the 10th of the month following the month in which the end of contribution period falls. Therefore, contributions for March can be made by April 10.
