	CAD1,500	CAD1,000,000
	NZD2,000	NZD1,200,000
Additional	-	-

What is this product?

Invesco Asian Bond Fund (the "Fund") is a fund constituted in the form of a mutual fund. It is domiciled in Luxembourg and its home regulator is the CSSF, Luxembourg supervisory authority.

Objectives and Investment Strategy

The objective of the Fund is to generate income and long term capital growth. The Fund seeks to achieve its objective by investing primarily (at least 70% of the net asset value of the Fund) in Asian debt securities, which may include investment grade, non-investment grade, unrated debt securities and convertibles.

Asian debt securities shall include debt issued or guaranteed by Asian governments, local authorities/public authorities and corporates denominated in hard currencies (i.e. globally traded major currencies). Asian corporate issuers shall be understood to mean issuers or guarantors which (i) have their registered offices or headquarters located in an Asian country or (ii) carry out their business activities predominantly (50% or more by revenue, profit, asset or production) in Asia.

The asset allocation employed by the investment manager is largely unconstrained in nature with no minimum/maximum allocation to specific countries, sectors and/or credit quality.

Up to 30% of the Fund's assets may be invested in cash and cash equivalents, and debt securities not meeting the above requirements, of issuers worldwide and denominated in any currency.

The Fund may invest in debt instruments with loss-absorption features ("LAP"), including contingent convertible debt securities and debt instruments meeting the qualifying criteria to be Additional Tier 1 Capital or Tier 2 Capital under the Banking (Capital) Rules and debt instruments issued under an equivalent regime of non-Hong Kong jurisdictions, in addition to senior non-preferred debt with a bail-in flag on Bloomberg or any other debt security with a bail-in flag, as classified by Bloomberg. These instruments may be subject to contingent write-down or contingent conversion to ordinary shares on the occurrence of trigger event(s). The Fund's expected total maximum investments in LAP will be up to 40% of its net asset value.

For the purposes of the Fund, Asian countries have been defined as all countries in Asia excluding Japan but including Australia and New Zealand.

The Fund may invest up to 100% of its net asset value in debt securities which are unrated (debt securities which are not rated by any international rating agency such as Moody's, Standard & Poor's and Fitch) or rated below investment grade (below investment grade is defined as credit rating that is below BBB- from Standard & Poor's and Fitch, or below Baa3 from Moody's or an equivalent rating from an internationally recognized rating agency).

The Fund may use derivatives (including but not limited to futures, forwards, non-deliverable forwards, swaps and complex options structures) for hedging and efficient portfolio management purposes. Such derivatives may also incorporate derivatives on derivatives (i.e. forward dated swaps, swap options). However, financial derivative instruments will not be extensively used for investment purposes (i.e. entering into financial derivative instruments to achieve the investment objectives).

Use of derivatives / investment in derivatives

The Fund's net derivative exposure¹ may be up to 50% of the Fund's net asset value.

What are the key risks?

Investment involves risks. Please refer to the Prospectus for details including the risks factors.

- **General investment risk** - There can be no assurance that the Fund will achieve its investment objective. The instruments invested by the Fund may fall in value due to any of the key risk factors below and therefore your investment in the Fund may suffer losses. There is no guarantee of the repayment of principal.
- **Currency exchange risk**
 - The Fund's assets may be invested in securities denominated in currencies other than the base currency of the Fund. Also, a class of shares may be designated in a currency other than the base currency of the Fund. The net asset value of the Fund may be affected unfavorably by fluctuations in the exchange rates between these currencies and the base currency and by changes in exchange rate controls.
 - For the hedged share classes, there is no guarantee that the exposure of the currency in which the shares are

¹ Please refer to the offering document for details regarding the calculation methodology of net derivative exposure.

denominated can be fully hedged at all times against the base currency of the Fund or the currency or currencies in which the assets of the Fund are denominated. Investors should also note that the successful implementation of the strategy may substantially reduce the benefit to shareholders in the relevant class of shares as a result of decreases in the value of the share class currency against the base currency of the Fund. In the event that investors request payment of redemption proceeds in a currency other than the currency in which the shares are denominated, the exposure of that currency to the currency in which the shares are denominated will not be hedged.

- **Credit risk**

- Investment in bonds, debt or other fixed income securities (including corporate and sovereign bonds) are subject to the risk that issuers do not make payments on interest and principal of such securities. An issuer suffering from an adverse change in its financial condition could lower the quality of a security leading to greater price volatility on that security.
- Securities which were investment grade at the time of acquisition may be downgraded. The risk of any such downgrading will vary over time. The Fund's investment policy does not specifically require the Fund to sell such securities if they should fall below investment grade. Besides, the Investment Manager and/or Investment Sub-Manager (if applicable) may not be able to dispose of the debt instruments that are being downgraded. Investments in below investment grade securities carry a higher risk of default and therefore may adversely impact the Fund and/or the interests of investors.

- **Interest rate risk** - The bonds or fixed income securities that the Fund invests in may fall in value if the interest rates change and this will adversely impact the net asset value of the Fund. In general, the prices of debt securities rise when interest rates fall, whilst their prices fall when interest rates rise. Longer term debt securities are usually more sensitive to interest rate changes.

- **Liquidity risk** - The Fund may be adversely affected by a decrease in market liquidity for the securities in which it invests where some of the Fund's securities may become illiquid and the Fund may experience difficulties in selling securities at a fair price within a timely manner.

- **Credit rating risk** - Credit ratings assigned by rating agencies are subject to limitations and do not guarantee the creditworthiness of the security and/or issuer at all times.

- **Concentration risk** - As the Fund will invest primarily in Asian debt securities, such concentration may exhibit a higher than usual degree of risk and the Fund may be subject to above average volatility. The diversification benefits that would ordinarily accrue from investment in a fund having a more diverse portfolio of investments, may not apply to this Fund.

- **Emerging markets risk** - The Fund invests in emerging markets which may involve increased risks and special considerations not typically associated with investment in more developed markets such as, liquidity risk, currency risks/ control, political and economic uncertainties, policy, legal or regulatory event affecting the relevant markets and taxation risks, settlement risks, custody risk and the likelihood of a high degree of volatility.

- **Risks associated with investments in debt instruments with loss-absorption features (LAP)**

- Debt instruments with loss-absorption features are subject to greater risks when compared to traditional debt instruments as such instruments are typically subject to the risk of being written down or converted to ordinary shares upon the occurrence of a pre-defined trigger event(s) (e.g. when the issuer is near or at the point of non-viability or when the issuer's capital ratio falls to a specified level), which are likely to be outside of the issuer's control. Such trigger events are complex and difficult to predict and may result in a significant or total reduction in the value of such instruments.
- In the event of the activation of a trigger, there may be potential price contagion and volatility to the entire asset class. Debt instruments with LAP may also be exposed to liquidity, valuation and sector concentration risk.
- The Fund may invest in contingent convertible debt securities, commonly known as CoCos, which are highly complex and are of high risk. Upon the occurrence of the trigger event, CoCos may be converted into shares of the issuer (potentially at a discounted price), or may be subject to the permanent write-down to zero. Coupon payments on CoCos are discretionary and may be cancelled by the issuer at any point, for any reason, and for any length of time.
- The Fund may invest in senior non-preferred debts. While these instruments are generally senior to subordinated debts, they may be subject to write-down upon the occurrence of a trigger event and will no longer fall under the creditor ranking hierarchy of the issuer. This may result in total loss of principal invested.

- **Risk of investing convertibles/convertible bonds/convertible debts** - Convertibles/convertible bonds/convertible debts are a hybrid between debt and equity, typically permitting holders to convert into shares in the company

issuing the bond at a specified future date. As such, convertibles/convertible bonds/convertible debts may be exposed to equity movement and greater volatility than non-convertibles/convertible bonds/convertible debts investments. Investments in convertibles/convertible bonds/convertible debts are subject to the similar interest rate risk, credit risk, liquidity risk and prepayment risk associated with comparable non-convertibles/convertible bonds/convertible debts investments.

- **Risk of investing in high yield bonds/non-investment grade bonds and un-rated bonds** - The Fund may invest in high yield bonds/ non-investment grade bonds and un-rated bonds which involve substantial risk. High yield bonds/ non-investment grade bonds and un-rated bonds are regarded as being predominantly speculative as to the issuer's ability to make payments of principal and interest. Issuers of high yield bonds/ non-investment grade bonds and un-rated bonds may be highly leveraged, subject to lower liquidity and higher volatility and may not have available to them more traditional methods of financing. An economic recession may adversely affect an issuer's financial condition and the market value of high yield bonds/ non-investment grade bonds and un-rated bonds issued by such entity. High yield bonds/ non-investment grade bonds and un-rated bonds are generally subject to greater loss of principal and interest than high-rated bonds. As such, this may adversely impact the Fund and/or the interests of investors.
- **Sovereign debt risk** - The Fund's investment in securities issued or guaranteed by governments may be exposed to political, social and economic risks. In adverse situations, the sovereign issuers may not be able or willing to repay the principal and/or interest when due or may request the Fund to participate in restructuring such debts. The Fund may suffer significant losses when there is a default of sovereign debt issuers.
- **Risk of investing in perpetual bonds** - The Fund is permitted to invest in perpetual bonds. Perpetual bonds (bonds without a maturity date) may be exposed to additional liquidity risk in certain market conditions. The liquidity for such investments in stressed market environments may be limited, negatively impacting the price they may be sold at, which in turn may negatively impact the Fund's performance.
- **Risk of investing in financial derivative instruments ("FDI") for efficient portfolio management and hedging purposes** - Investments of the Fund may be composed of FDI used for efficient portfolio management or to attempt to hedge or reduce the overall risk of its investments. Risks associated with FDI include counterparty/credit risk, liquidity risk, valuation risk, volatility risk and over-the-counter transaction risk. The leverage element/component of a FDI can result in a loss significantly greater than the amount invested in the FDI by the Fund. Exposure to FDI may lead to a high risk of significant loss by the Fund.
- **Risks associated with payment of dividends and/or fees and expenses out of capital**
 - Payment of dividends out of capital and/or effectively out of capital amounts to a return or withdrawal of part of an investor's original investment or from any capital gains attributable to that original investment. Any such distributions may result in an immediate reduction of the net asset value per share in respect of such share class after the monthly distribution date.
 - For Monthly Distribution-1 share classes that are currency hedged, the Fund may take into account the return driven by the interest rate differential between the currency in which the hedged Monthly Distribution-1 share class is denominated and the base currency of the Fund in determining the distribution to be paid. Investors should be aware that the uncertainty of relative interest rates which will have an impact on the return of the hedged Monthly Distribution-1 share class. The net asset value of the Monthly Distribution-1 hedged share class may fluctuate and may significantly differ from other share class due to the fluctuation of the interest rate differential between the currency in which the hedged Monthly Distribution-1 share class is denominated and the base currency of the Fund, and may result in an increase in the amount of distribution that is paid out of capital and hence a greater erosion of capital than other non-hedged share class. Investors in such share class may therefore be adversely affected.
- **Portfolio Turnover Risk** - The Fund may engage in significant turnover of the underlying securities held. This may involve the Investment Manager selling a security or entering into the close out of a derivative position when it believes it is appropriate to do so, regardless of how long the Fund has held the instrument. This practice may be carried out on a continuous basis, where the Investment Manager believes it is in the best interests of shareholders. These activities increase the Fund's portfolio turnover and may increase the Fund's transaction costs, however, any potential costs will be considered as part of the investment decision to ensure it is in the best interests of the Fund.
- **Dynamic Asset Allocation Risk** - The Investment Manager has wide discretion to allocate dynamically within an asset class or between different asset classes. The allocation of investments between different asset classes or between segments of the same asset class may have a significant effect on the Fund's performance. The Fund could miss attractive investment opportunities by having underweight exposure in markets that subsequently experience significant returns and could lose value by being overweight in markets that subsequently experience significant declines. As a result, the relevance of the risks associated with investing in each asset class (or segment

of the same asset class) will fluctuate over time. This may result in possible substantial and sudden changes to the Fund's risk profile. In addition, the periodic allocation or rebalancing of investments may incur greater transaction costs than a fund with static allocation strategy.

How has the Fund performed?

■ (From 18 March 2019) The performance shown in the chart above was based on an investment objective and policy that no longer applies, with certain changes being made to the Fund on 18 March 2019.

- The Fund Manager views Class A monthly distribution - USD (the "Share Class"), being the focus share class of the Fund available to the public of Hong Kong, as the most appropriate representative unit class.
- Fund launch date: 15 December 2011.
- Share Class launch date: 15 December 2011.
- The base currency of the Fund is USD.
- Past performance of the Share Class is calculated in USD.
- Performance is calculated after deduction of ongoing charges and is inclusive of gross income reinvested. Any entry/exit charges shown are excluded from the calculation.
- Past performance is not a guide to future performance.
- Investors may not get back the full amount invested.
- The computation basis of the performance is based on the calendar year end, NAV-To-NAV, with dividend reinvested.
- These figures show by how much the Share Class increased or decreased in value during the calendar year being shown.
- Where no past performance is shown, there was insufficient data available in that year to provide performance.

Is there any guarantee?

The Fund does not have any guarantees. You may not get back the full amount of money you invest.

What are the fees and charges?

Charges which may be payable by you

You may have to pay the following fees when dealing in the shares of the Fund.

Fee	What you pay
Subscription fee/ Initial charge	Class A: Not exceeding 5.00% of the gross investment amount. Class C: Not exceeding 5.00% of the gross investment amount.
Switching fee	Up to 1.00% of the value of the shares being switched.
Redemption fee	N/A

--------------------	--

*The fees can be increased subject to the prior approval of the Securities and Futures Commission ("SFC") and by giving not less than three months' prior notice to the investors.

Other fees

You may have to pay other fees when dealing in the shares of the Fund.

Additional Information

- The compositions of the dividends (i.e. the relative amounts paid out of (i) net distributable income and (ii) capital) for the last 12 months are available from the Hong Kong Sub-Distributor and Representative on request and at www.invesco.com.hk. This website has not been reviewed by the SFC.
- You generally buy and redeem shares at the Fund's next-determined net asset value after the Hong Kong Sub-Distributor and Representative receives your request in good order on or before 5:00pm, Hong Kong time, being the Fund's dealing cut-off time. Before placing your subscription or redemption orders, please check with your distributor for the distributor's internal cut-off time (which may be earlier than the Fund's dealing cut-off time).
- The net asset value of the Fund is calculated each "Business Day" as defined in the Prospectus and the price of shares is published each Hong Kong business day (i.e. a day on which banks in Hong Kong are open for normal banking business) at www.invesco.com.hk. This website has not been reviewed by the SFC.
- Investors may obtain the past performance information of other share classes offered to Hong Kong investors at www.invesco.com.hk. This website has not been reviewed by the SFC.
- Investors may obtain other information of this product at www.invesco.com.hk. This website has not been reviewed by the SFC.
